Portable Color Doppler Ultrasonic System Slimmer I Clearer I Stronger

### **Ergonomic Design**

Match the ingenious ergonomic design with the compact size, M5 has remarkable adaptability which can fit variable usage scenario.

Transducers

### Efficient and Fast Workflow

- Multiple user-defined programming buttons
- One-key Automatic Optimization Technology
- One-key operation flow, quick switching and easy to use
- Visualize user-defined presets function (QSave)
- Metadata and image postprocessing
- DICOM 3.0
- USB 3.0 port, built-in DVD, make transmission more convenient
- Thumbnail clipboard easy to review the images and videos

### Technologies

#### **Pulse Inverse Harmonic Imaging PIHI**

PIHI reduces the distortion generated by the fundamental wave, and greatly improve the signal-to-noise ratio.

#### Speckle Reduction Imaging

SRI technology significantly reduces the unwanted speckle, provides enhanced tissue boundary and tissue echo for confident clinical diagnosis.

#### **Spatial Compound Imaging**

SCI provides better contrast resolution, reduces the speckle noise and smoothes the imaging of homogeneous tissue.

## uSeed Platform

M5 facilitates accurate diagnosis based on uSeed metadata beamforming imaging technology platform. This brand-new platform is developed by CPU + GPU heterogeneous computing technology. The images in uSeed platform are saved as metadata for postprocessing.

#### Frequency Composite Imaging

Combine the high penetration of the fundamental frequency and the high resolution of the harmonic frequency to improve the detail resolution and contrast resolution of the near field and the far field to provide the best image quality.

FCI ON

## **Comprehensive Clinical Applications**

M5 provides remarkable performance in Abdomen, Gynecology (including endocavity), Obstetric, Cardiology, Small parts (Breast, Testes, Thyroid, etc.), Urology, Musculoskeletal and Peripheral vascular. A variety of imaging modes brings a comprehensive clinical application.

- B Steer, 3D/4D, ZPage, Zlive, PW, CW, AMM, CMM, Panoramic Imaging, Elastic imaging mode, EFOV, TDI - Auto IMT, Auto NT, Auto Trace, TSI, THI, SRI, SCI, FCI, Biopsy function

## Radiology

**Elastic Imaging** Elastography plays an important role in clinical diagnosis, especially in lesions assessing. Elastography imaging could detect the hardness of nodule, therefore it may help to differentiate malignant from benign lesions.

## Cardiology

TDI

## AMM

### **Obstetrics and Gynecology**

#### 3D/4D

in the images.

#### **Panoramic Imaging**

Panoramic Imaging could help to get extended and complete view of the anatomical structure.

Tissue Doppler Imaging (TDI) could monitor local myocardial movement, and evaluate the movement quantitatively.

AMM allows placing up to 3 sample lines at any angles, the thickness and thickening of each ventricular wall could be observed accurately, which is also helpful for the accurate meas urement of ejection fraction.

Zoncare advanced 3D/4D mode delivers amazing lifelike 3D/4D images. With Zlive, M5 has the ability to manipulate light and shadow anywhere
